

SEAVIEW STUDIO

Copper Foil 'Tiffany Technique'

1 day course - £140 per person

The copper foiled or 'Tiffany technique', was developed in the US by Louis Comfort Tiffany, one of the pioneers in the Arts and Crafts movement, in the late 1800's. This method of wrapping the edges of the glass in a self adhesive copper tape became popular, as you need less specialist equipment than you would for traditional leadwork or fused glass. You are also not restricted by lead came so you can make more intricate patterns, panels, suncatchers or 3D forms. You may be familiar with Tiffany lampshades? - These are constructed using copper foil and solder. Copper foil work is suitable for interior decorations.

On the day you will be able to select from one of several predesigned sun catcher templates to create something special to take home and hang in your window. You don't need any experience in working with glass as I will take you through each step of the process from learning to select your glass, how to cut and grind the edges, foil, flux, then solder, clean and finish your work.

Your day will be fun and relaxed with a maximum of 6 students. If you have already tried this technique and want a refresher then this day is also perfect for you.

LOCATION:

Where better to make stained glass than in a Chapel in the beautiful village of Old Bursledon? The workshop is held at (GAF) Greyladyes Arts Foundation, a lovely grade II listed chapel on School Rd, Old Bursledon, SO31 8BX.

There is some parking on the road outside the chapel or just around the corner on High street. The nearest train station is Bursledon which is served by trains on the Southampton - Portsmouth line - just 10 mins walk away.

COURSE TIMES:

Your day will start at 10am but please arrive at 9:50 to shake of the journey and grab a cuppa, lunch will be at approximately 1:30pm for 1/2 hour and we will finish at 4pm depending on progress. Tea, Coffee and biscuits will be provided and are inclusive. Please bring along a packed lunch. Please note the kitchen in the Chapel has limited facilities; there is a kettle and fridge, however, no way to heat food. There is is One Stop in Lowford, 2 mins drive down the road if required.

H&S:

You will be working with sharp glass, hot tools and machinery, however, I will teach you how to be safe when working. You will be standing for most of the day so please wear flat comfortable shoes (no open toes) and old clothes.

You will be provided with all the equipment, safety equipment and materials; glass, foil, solder to enable you to complete your project... just bring along your enthusiasm...and lunch!

SEAVIEW STUDIO

Course Terms and Conditions

Booking information

- Seaview Studio is run by Jo Munford as a sole trader.
- Contact Jo Munford on +44 (0)7930 144774 or email jo@seaview-studio.co.uk if you have any questions about the course.
